

Biomedical Engineering Seminar Series

1st Semester, Academic Year 2015

Date: August 18, 2015

Time: 10.00-11.00 AM

Room 6373, 3rd level, Building 3,
Department of Biomedical Engineering,
Faculty of Engineering;
Mahidol University

Pasin Israsena, Ph.D.

Research Unit Director

Biomedical Electronics and Systems Development Unit
(BESDU)

National Electronics and Computer Technology Center
(NECTEC)

National Science and Technology Development Agency
(NSTDA)

“NECTEC and Its Roles in Promoting Biomedical Engineering Technology in Thailand”

This talk gives an overview of how a national research organization such as NECTEC may work with universities and industrial partners to foster biomedical engineering technology and related innovation in Thailand. A review of NECTEC's biomedical engineering activities, especially some of the works under the Biomedical Electronics and Systems Development Unit, will be provided.
