UV-VIS Spectrophotometer

SHIMADZU Model: UV-1800

Chemical Engineering
Mahidol University

UV-VIS Spectrophotometer is an instrument used to analyze the absorption of light by substances in the ultraviolet (UV) and visible (VIS) spectrum. The principle of operation involves passing light through a sample and measuring the amount of light absorbed by the sample at different wavelengths.

Applications :

- Chemical Analysis
- Pharmaceutical Industry
- Environmental Analysis
- Biomolecule Analysis
- Food and Beverage Industry

Service fees

Details	Students and staff within the university/ institute partners (MOU)	External personnel (government organization)	External personnel (private organization)
UV-VIS Spectrophotometer	100 THB/hr.	150 THB/hr.	200 THB/hr.
